

Hi there,

did you download the template from our site? Ok, great - here's a little more info about how to make custom Lemon Books. Please feel free to E-Mail us with any questions: hello@lemonbooks.de

- + The print file needs to be saved as print-ready PDF (print quality) PDF-X1 or PDF-X3
- + The document should be created as InDesign file, single page, open format A5 (210 mm x 148 mm)
- + Please make sure to add 3mm bleed (InDesign + PDF)
- + All fonts must be embedded in the PDF or converted to shapes (create outlines)
- + All colours are in RGB or CMYK mode. Special colours from the Pantone library must be converted.
- + If you add effects like drop shadows etc. there'll be transparencies. Please make sure to flatten transparency when exporting the PDF file in high resolution. (Transparency Flattener/high resolution)
- + When creating the PDF file choose no colour conversion (colour management)
- + Choose Euroscale Coatedv2 when you save the file.
